# PRODUCTS & SERVICES

	SERVICES	PRODUCTS
ACCESS CONTROL	Supply, Install, Service & Repair	Keypads, Proximity Systems, Biometrics & Coin Locks
AUTOMATION	Supply, Install, Service & Repair	Gate / Garage Door Motors, Booms & Turnstiles
BENCHWORK	Service, Repair, Key Manufacture	All types of Locks including Cars
CCTV	Supply, Install, Service & Repair	Quads, DVR's, Cameras & Monitors
ELECTRIC FENCING	Supply, Install, Service & Repair	Wall Top & Free Standing
ELECTRIC LOCKS	Supply, Install, Service & Repair	Strikes, Box Locks, Mag Locks & Eletrikkas
INTERCOMS	Supply, Install, Service & Repair	Buzzers, Audio, Video & Tele-Dialers
KEYS	Supply & Cutting	All types of Keys
LOCKS / LOCKSMITHING	Call-Outs, Opening, Supply, Install & Repair	Houses, Cars, Safes, Padlocks, Mortice & all types of Locks
METAL WORK	Manufacture	Spikes, Security Gates , Security Screens & Burglar Bars
REMOTES & RECEIVERS	Supply, Install, Service & Programme	All Remotes & Receivers
SAFES	Supply, Install, Opening & Moving	Wall, Office, Rifle, Digital, Category Safes & Strong Room Doors
SECURITY / SELF DEFENCE	Supply Only	Pepper Sprays, Stun Guns, Batons, Metal Detectors & Handcuffs

All services available during office hours: 041 365 7565  
or on 24 hour call-out: 083 709 2510

# ACCESS CONTROL

Houdini fits and supplies a wide variety of access control systems including keypads, tag operated proximity systems as well as biometric readers.

We offer a stand-alone option for smaller applications or pc based audit trail for more complex intergrated systems.

## COIN OPERATED LOCKS

*Ideal product for the following applications:*

- Public toilets
- Petrol stations
- Shopping centers
- Stadiums

Stainless steel body

Available in a R1 or R2 option

Large volume coin holder

## KEYPADS

The centurion smartguard is a durable, quality keypad designed to provide security access control to restricted areas. The unit is weatherproof, and the keypad buttons are backlit for ease of use at night. The access code can vary from one to ten digits.

## PROXIMITY SYSTEMS

Proximity readers are designed to meet the need for a cost effective networked access control system. The system can operate as a stand alone reader or can be networked with up to 31 slave readers. Optional easy to use pc based software can be added to increase functionality. Up to 1000 tags can be programmed.

## BIOMETRIC FINGERPRINT READERS

Most physical access control systems in use today are based upon proximity cards or identification numbers. Unfortunately this technology does not prevent individuals from using someone else's card or id to enter a restricted area.

Biometric technology provides strong user authentication to avoid this type of security breach. Combined with contactless smart cards, biometrics also allow multi-factor user authentication, and as a result reinforce the system's overall level of security.

The above systems can be linked to operate in conjunction with our electric or electro-magnetic locks – see page 6.

**Call one of our highly trained security consultants for a free access control assessment & no obligation quotation.**

**“WE LOCK YOUR WORLD”**

# AUTOMATION

GATE MOTORS | GARAGE DOORS | BOOM GATES | BOLLARDS  
TURNSTILES | MANTRAP DOORS | BI-PARTING DOORS

## CENTURION GATE MOTORS

There are a wide variety of sliding gate motors on the market but Houdini prefers to use the tried and tested Centurion products. Centurion is represented locally and has a 24 hour turn around time on all gate motor repairs.

**D2:** A 12V DC battery revs the D2 turbo up to 9000 rpm moving a gate weighing up to 250kg's at 24 meters per minute

**D3:** A robust workhorse used for domestic sliding gates up to 300kg in weight

**D5:** one of the most durable and reliable motors ever made. A motor used for domestic and light industrial applications on gates up to 500kg's in weight

**D10:** perfect for industrial and commercial applications where heavy gates are used. The D10 uses a battery driven hi-torque 24V DC motor coupled to a robust gearbox providing a system that is fast, powerful and battery backed-up.

**A10:** the A10 gate motor is in a class of its own, using a high-torque 3 phase motor and a custom designed frequency inverter to provide a fully speed controlled system capable of moving industrial gates weighing up to 2 tons.

## GARAGE DOOR MOTORS

Houdini prefers to use the digidoor garage door operator. The motor is very reliable and the price is comparable to other motors in the market. The agents are local so spare parts are available ensuring a quick turn-around time on repairs.

## HIGH VOLUME BOOM GATE SYSTEMS

Boom gates are used to control the entry and exit of vehicles at townhouse complexes, industrial parks, airports and shopping centers. They can be controlled by remote or proximity tags – see page 2 for access control

## TURNSTILES

Turnstiles are used to restrict access to premises as well as grant access to specific users. The use of a turnstile leads to a safe and secure site.

## LOSS OF STOCK + LOSS OF PRODUCTIVITY= LOSS R... SOLUTION?

Houdini can provide a taylor made CCTV system from stand-alone to highly intergrated with on or off site monitoring. Call one of our highly trained security consultants for a free assessment & a free no obligation quotation

### DIGITAL VIDEO RECORDER (DVR)

The DVR has a built-in hard drive that records all CCTV footage. The DVR comes with a remote that allows you to go back in history and view recorded footage. DVR's are available in 4, 8 & 16 channels

### CCTV MONITOR

CCTV monitors are available from 7 inch to 42 inch

### BASIC CCTV CAMERAS

There is a wide range of cctv cameras available for different applications. Cameras with a higher tv line count will give you a clearer, more detailed and better quality picture. Cameras with built-in led's will allow you to view night-time footage. Zoom lenses can be fitted to cameras providing a larger more flexible angle and creating either a wide or zoomed view to get a closer look at the person or object being viewed.

### ADVANCED CAMERAS

#### PAN-TILT-ZOOM CAMERA (PTZ)

PTZ cameras are advanced surveillance cameras that allow an operator or computer to control the camera to view and zoom in on a specific area, object or person. They are usually used in commercial applications such as retail stores, large parking areas & airports or in high security environments such as banks and government installations. The cameras can be operated by using a joystick controller (pictured above right) or they can be pre-set to follow a pre-determined viewing pattern.

### INTERGRATED CCTV SYSTEM

#### COVERT CAMERA DVR'S

Houdini carries a range of covert camera's with built-in recording devices. These units are used to record footage and sound without the intended targets knowledge.

# PERIMETER SECURITY

Houdini's philosophy to security is one that follows a layered approach. The most critical part of this layered approach is perimeter security as it is the 1st line of defense. The two best forms of perimeter security are firstly, electric fencing and secondly, outdoor point to point beams.

## ELECTRIC FENCING

### HOUDINI'S "5D" APPROACH

**DETER – DEFEND – DENY – DETECT - DELAY**

Electric fencing's biggest attribute is that it offers a visual deterrent that defends the perimeter of your residence. The electric fence should deny entry and if tampered with, will detect and trigger an alarm which can be linked to your armed response company. This delays intrusion whilst increasing armed response reaction and intruder apprehension time.

## ELECTRIC FENCE ENERGISER

The "brains" of the electric fence is responsible for activation of the alarm as well as creating the voltage that runs through the fence. It is equipped with a battery back-up in case of power failure. Energizers are available in different strengths as well as single or multiple zones.

## ELECTRIC FENCE KEYPAD

The keypad allows the user to activate and de-activate the electric fence & alarm from inside the premises

## ELECTRIC FENCE WARNING SIGN

## OUTDOOR BEAMS

Outdoor beams are installed as part of a layered security system. They consist of two point to point dual beams positioned to protect a vulnerable area of a property. Their main objective is to detect and provide an early warning. When triggered a siren is activated scaring off the would be intruder as well as alerting the home owner to a possible intrusion. Outdoors beams are now also available as strip beams used to cover windows and sliding doors as pictured above.

**"WE LOCK YOUR WORLD"**

# SAFES / STRONGROOMS

Houdini stocks and supplies an extensive range of safes. From basic wall safes to SABS & insurance approved categorised safes we have a solution for your requirements. We are also an authorised dealer of strongroom doors. We open & service existing safes as well as offering a safe removal & delivery service.

## WALL SAFES

Wall safes are basic entry-level safes capable of storing low value items. They are fitted with a 7 lever safe lock and need to be bolted to the wall.

## DIGITAL SAFES

A digital safe is used to protect important documents and personal items. The electronic keypad entry lock is much easier to use than the old traditional keylock systems. The keypad also offers additional security as the electronic keypad will automatically go into lockdown mode should it be tampered with. The lock remains idle for a period of 5 minutes. They operate off 4 penlite batteries & have a key-override in cases of battery failure. Models available include mini, midi, maxi, laptop, drop, hotel & SABS approved handgun.

## RIFLE SAFES

Rifle safes are used to store rifles, handguns and ammunition. They come standard with 3 locking bolts activated by a 7 lever safe lock. Rifle safes need to be bolted to the wall to comply with SABS standards.

# SAFES / STRONGROOMS

## OFFICE SAFES

Office safes are free-standing and come in various sizes to suite your requirements. They are used to store documents as well as medium value items. The steel wall cavities are encased with high density concrete making them extremely heavy as well as fire resistant. They are insurance rated to carry R5000 in cash.

## CATEGORY SAFES

Category safes come in various sizes and gradings from cat 1 to cat 5. They are insurance rated as follows cat 1 – R5000, cat 2 – R12 500, cat 2adm – R50 000, cat 3 – R100 000, cat 4 – R200 000, cat 5 – R300 000. The steel wall cavities are encased with high density concrete making them extremely heavy as well as fire resistant. Doors are manufactured from anti-destructive materials and in most cases come with built-in re-lockers. New and re-furbished safes are available.

## STRONG ROOM DOORS

Strong room doors are used to lock storage areas where sensitive or costly items are stored. Doors come in different categories ranging from record room doors to category 3 strong room doors. New and re-furbished doors are available.

**“WE LOCK YOUR WORLD”**

# SECURITY

Houdini carries a wide range of security and detection items. Please call one of our salesmen for advice and prices.

1.

2.

3.

4.

5.

6.

7.

1. Convex Mirrors 30-90cm
2. Vehicle Search Mirrors
3. Metal Detectors
4. Batons
5. Handcuffs
6. Alcohol Test Kits
7. UV Money Lamps

Houdini carries a wide range of personal self defence items. All items are kept in stock and can be viewed in our store

Stun guns use high voltage and low amperage to temporarily disable an attacker for several minutes. For 1-2 seconds, it will cause muscle spasms and a dazed mental state. For 3-5 seconds, it will cause loss of balance and muscle control, total mental confusion and disorientation, leaving him dazed. Under no conditions can you suffer a charge back to your own body, even if the assailant touches you while you are using a stun gun on him. As it is a non-lethal weapon there are no legal implications for the user.

1. The Enforcer 2.5 Mill Volts
2. The General 3 Mill Volts
3. Telescopic Batons
4. The Ultimate 1.6mill Volts
5. Cell Stun Gun 1.4mill Volts
6. Pepper Spray 24gram (40ml) – 60gram (100ml)

When sprayed into someone's eyes and face, pepper spray irritates the skin, eyes and mucous membranes of the upper respiratory tract. Coughing and choking may be experienced. It is very uncomfortable and there is pain associated with it.

The end result is temporary incapacitation, mostly due to not being able to see. Attackers are too preoccupied with the blinding and painful experience to even attempt to do anything violent to you. If properly contaminated with pepper spray, an attacker will not be able to open their eyes for between ten minutes to an hour, allowing you plenty of time to escape safely.

# INTERCOMS

Houdini makes use of a wide range of intercom products to suite specific applications. From basic audio to complex teli-dialers we have a solution to suite your requirements.

## AUDIO INTERCOMS

KOCOM 1-1 AUDIO

KOCOM 1-2 AUDIO

KOCOM 4-4 AUDIO

## VIDEO INTERCOMS

VIDEO HANDSET

VIDEO HANDS FREE

COLOUR VIDEO

## COMPLEX TELI-DIALERS

All the above intercoms can work in conjunction with our electric locks see page 6 or gate automation see page 4.

Houdini carries the widest range of locks in Port Elizabeth.  
You name it, we have got it!

All items are available at our Newton Park retail outlet. We also have mobile call out vehicles to respond to any lock problems you may be experiencing.

## PADLOCKS

All makes - all sizes - low security - high security - weatherproof – keyed alike – master keyed.

## RIM LOCKS/NIGHTLATCHES

## MORTICE LOCKS/HANDLES

2,3,4 & 5 Lever mortice locks, light duty, heavy duty, deadlocks, hook locks, profile cylinder locks, large oval, small oval

## CYLINDERS

These are just a few of our lock items, a fully comprehensive lock catalogue is available on hard copy cd or one can be e-mailed on request.

**“WE LOCK YOUR WORLD”**

# REMOTE TRANSMITTERS & RECEIVERS

Houdini carries the largest range of remote transmitters and receivers. Our testing and programming technology is cutting edge allowing us to satisfy all your remote control requirements.

ET ROLLING SELF LEARNING

ET ROLLING CODE REMOTES

CODEX REMOTES

SHERRI OTRONICS REMOTES

CENTURION REMOTES

DURATRONIC REMOTES

DIGI REMOTES

SUPERLIFT 4B

DTS 4B

SECURACODE

ACDC

We have recently upgraded our diagnostic cloning machines allowing us to combine multiple code hopping remotes onto one code hopping transmitter.

All the above remotes can be used in conjunction with our electric locks see page 3 or gate automation see page 4.

# TRANSPONDER KEYS - CAR LOCKS

We have equipped our technicians with the latest diagnostic equipment enabling us to cater for all your transponder technology requirements. From cloning keys, programming car key remotes to origination of lost keys we can do it all!

AUTO DIAGNOSTIC CODING MACHINE

VARIOUS TRANSPONDER KEYS

TOYOTA LOCKSET

VW LOCKSET

Houdini carries a large range of replacement door, boot & ignition locks as well as locksets, housings & electric switches for most makes of cars. We also repair, make keys to & alter the combination of all car locks.
